GreenCompact

For Short Staple any Top Arm

GreenCompact

GreenCompact is the compact spinning solution for savings, simplicity and sustainability.

Energy savings: GreenCompact is the one and only compact spinning without any additional power consumption.

Quality and cost: GreenCompact gives you the opportunity to tune your production individually to follow the markets demands (see table), without additional costs of production.

Sustainability: GreenCompact features a carbon neutral foot print. The public demand for fabrics made out of sustainable compact yarn increases and opens up new markets.

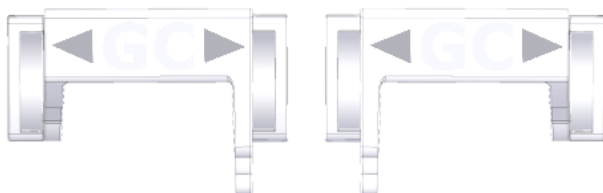

Choices for production parameters:

Parameter	Costs	Price	Earnings
Same raw material:	→	↑	compact yarn quality
Low grade material:	↓	→	standard yarn quality
Less yarn twist:	→	↑	up to 10% additional production (Softer yarn e.g. for knitting)

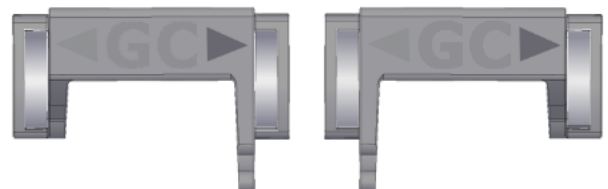

GreenCompact is available as tailor made unit to match your frame. Please visit our Website for additional information and contact our sales team for your inquiry.
